PRESIDENT ADDRESSES CONGRESS IN ADVANCE OF EMBARKATION FOR THE PEACE CONFERENCE

TELLS CONGRESS HE FEELS IT HIS DUTY TO GO TO FRANCE AND ASKS BODY FOR THEIR ENCOURAGEMENT

LAYS DOWN RECONSTRUCTION PLAN

By United Press

WASHINGTON, D. C., Dec. 2—President Wilson spoke out today against return to the old conditions of rail operations in his annual message to the joint session opening the short term of "Reconstruction Congress" The President outlined this and other measures of his policies of re-adjustment At the same time he explained his peace trip to Europe as one that it was his "duty to make". "May I not hope," he added, "that in the delicate task I shall now have to perform I may have the encouragement and the added strength of your united support"

The President's re-adjustment program as outlined includes —

Passage of Women Suffrage

Use of existing Governmental agencies to effect readjustment

Immediate resumption of public work to provide employment for returning soldiers.

Ratification of the Columbia Treaty to include Pan American relations.

Immediate determination of taxes for 1918, 1919, and 1920, releasing as much of the burden of taxes from business as conditions will permit.

Priority of distribution of American raw material to the war stricken nations, complete consummation of a three year naval program; leaves determination of railway's future to Congress but recommends against return to the pre-war conditions of railvaycontrol. Urges that the railway control question be studied by Congress immeidately to quickly remove doubt of the future.

The President declared he believed that a final peace will be completed by spring. Meantime he said the American business man with his "quick initiative" is going ahead with his readjustment. He added that no system would work better than the present government agencies.

The President paid glowing tribute to the American soldiers and sailors and their part in the war. "It is not the physical scale and the executive efficiency of preparations, supplies, equipment and dispatch that I would dwell upon but the mettle and quality of the officers and men who went over, the sailors who kept the seas, and the spirit of the nation that stood behind them No soldiers or sailors ever proved themselves more quickly ready for the test of battle or acquitted themselves with more splendid courage and achievement when put to the test."

By United Press

WASHINGTON, D. C., Dec. 2.—Congress today expressed its displeasure because President Wilson had not taken the Legislative Branch into his confidence in peace matters Senator Cummings introduced a resolution to create a semi-committee of eight "to observe the peace negotiations * * * * and keep the Senate posted"

It includes the sinking fund requirements, the postal service appropriation The total is $22,000 000 with the total estimate for 1919

WAR DEPARTMENT REPORT ON U. S PRISONERS IN GERMANY

(By United Press)

WASHINGTON, D C, Dec 2—Based on a report from General Pershing the War Department announced today that American prisoners released from German prison camps complained of scanty food and poor housing conditions 'American prisoners' said the statement, 'complain of poor and scanty food and bad housing conditions Only a small per cent of those who are sick are hospital cases. Many are suffering from slight colds Possibly all will recover rapidly with proper food and housing There is as yet no evidence of discrimination against Americans Among 7000 prisoners of all nationalities there have been no authenticated instances of brutality against Americans'

FOR GOLDEN RECORDS

Rome, Dec 2—Every municipality of Italy has just been invited by the government to open a Libro d'Oro' or "Golden Book" to the memory of all the inhabitants of each community who participated in the war

In addition to the name and address of each soldier there will be inscribed a full record of his promotions, his citations, his decorations and also where the case so demands his death

Each community will keep its "Golden Book" as part of the permanent archives of the municipality

SPROUL SELECTION OF CABINET GOOD NEWS TO EVERYONE

Governor elect Sproul at his office in the Union League yesterday, announced that William I Schaffer of Delaware county would be the attorney general, Cyrus E Woods, of Westmoreland county the secretary of the commonwealth and Harry S McDevitt of Philadelphia his private secretary

In telling newspapermen the personnel of his cabinet the governor elect said

"I am not going into the political field up there with a mowing machine but I may need a weeder"

Sproul made it plain that the next speaker of the house must be "dry" but, to use his own expression he "will not take the responsibility of a hand picked speaker" He was outspoken in his veiw that there has been too much interference from previous governors with thelegislative affairs

There was no announcement as to who will get the important position of state commissioner of health Dr Edward Martin of Philadelphia, formerly director of health and charities and who is now a member of the board of education, loomed up yesterday as the most likely of the aspirants for this post Doctor Martin is recognized as a leader in the medical profession and is a close friend of Senator Sproul

Dr John M Baldy, of Philadelphia is another candidate for this position whose claims have been urged upon the governor elect on account of his efficient work as president of the state bureau of medical education and licensure Altho his name has been frequently mentioned, Director Krusen of health and charities, is not a candidate for the appointment

"William I Schaffer of Delaware county, will be my attorney general Sproul said yesterday afternoon, when interviewed upon the appointments he would make after he takes his office on January 21

"If W Harry Baker wanted to be secretary of the commonwealth there is no one in the state more entitled to the position He thinks and others also, that he can be of more service as secretary of the senate I think that there he can keep me in close touch with affairs, altho I do not intend to attempt to influence legislation If he wanted to be secretary of the commonwealth no one else would be considered I expect to tender the place to Cyrus E Woods, the present secretary

"Harry S McDevitt will be my secretary He knows the state He knows who's who and probably knows more about the government of the state than anyone now in office He will not attempt to be a deputy governor He will be an efficient secretary to the governor"

"Are other changes contemplated at Harrisburg" the governor elect was asked

Well he replied 'to use a homely farm expression 'I'm not going into the political field up there with a mowing machine but I may need a weeder

While George W Williams of Tioga county and Robert S Spangler of York county, apparently are most considered of the aspirants for the speakership Sproul yesterday was emphatic in saying that he would not pick the speaker The speaker must be dry' he indicated and in entire sympathy with the chief issues in the platform upon which the governor elect was chosen

Various gentlemen of large influence said Sproul have suggested that my wishes would be considered [illegible] the speakership I want to avoid any interference with the legislative affairs in the state government There has been too much [illegible] thing in the past

The house will have to [illegible] own speaker but the man who has to be in sympathy with the chief issues of my platform I will not take the responsibility for any hand picked speaker."

HAGERTY BLOCK SOLD TO COUNTY NATIONAL BANK

A. J. Hagerty Retires From His Business With Respect and Esteem Of All People

BANK TO ENLARGE FACILITIES

As the culmination of a couple of important business deals just completed the County National Bank becomes the owner of the A J Hagerty block on Second street and as soon as conditions warrant the present Hagerty dry goods store room will be remodeled and become a part of the bank building

The rapidly increasing business of the County National the past few years has made an addition to their present commodious building a necessity and when the Hagerty property changed hands recently the bank saw their opportunity and succeeded in acquiring title to same from Archie Desling of Woodland, who recently purchased building and contents from Mr Hagerty who was forced to retire from active business by reason of failing eye sight

Plans have not been entirely completed thus far, but Clearfield people may expect to see one of the most modern and uptodate bank buildings in this section before many months go by

The retirement of A J Hagerty from the retail dry goods business marks the passing of one of Clearfield's oldest (in point of continuous business) and best known business men from our business life Mr Hagerty began his business career at the age of 16 years as a clerk in the general store of James B Graham & Co back in 1868 He continued with this firm until their retirement from business and then secured a position with Miller & Powell's hardware store and continued in their service until the store was purchased by H R Bigler He continued with Mr Bigler until the hardware business was again purchased by William Powell, father of the present W F Powell

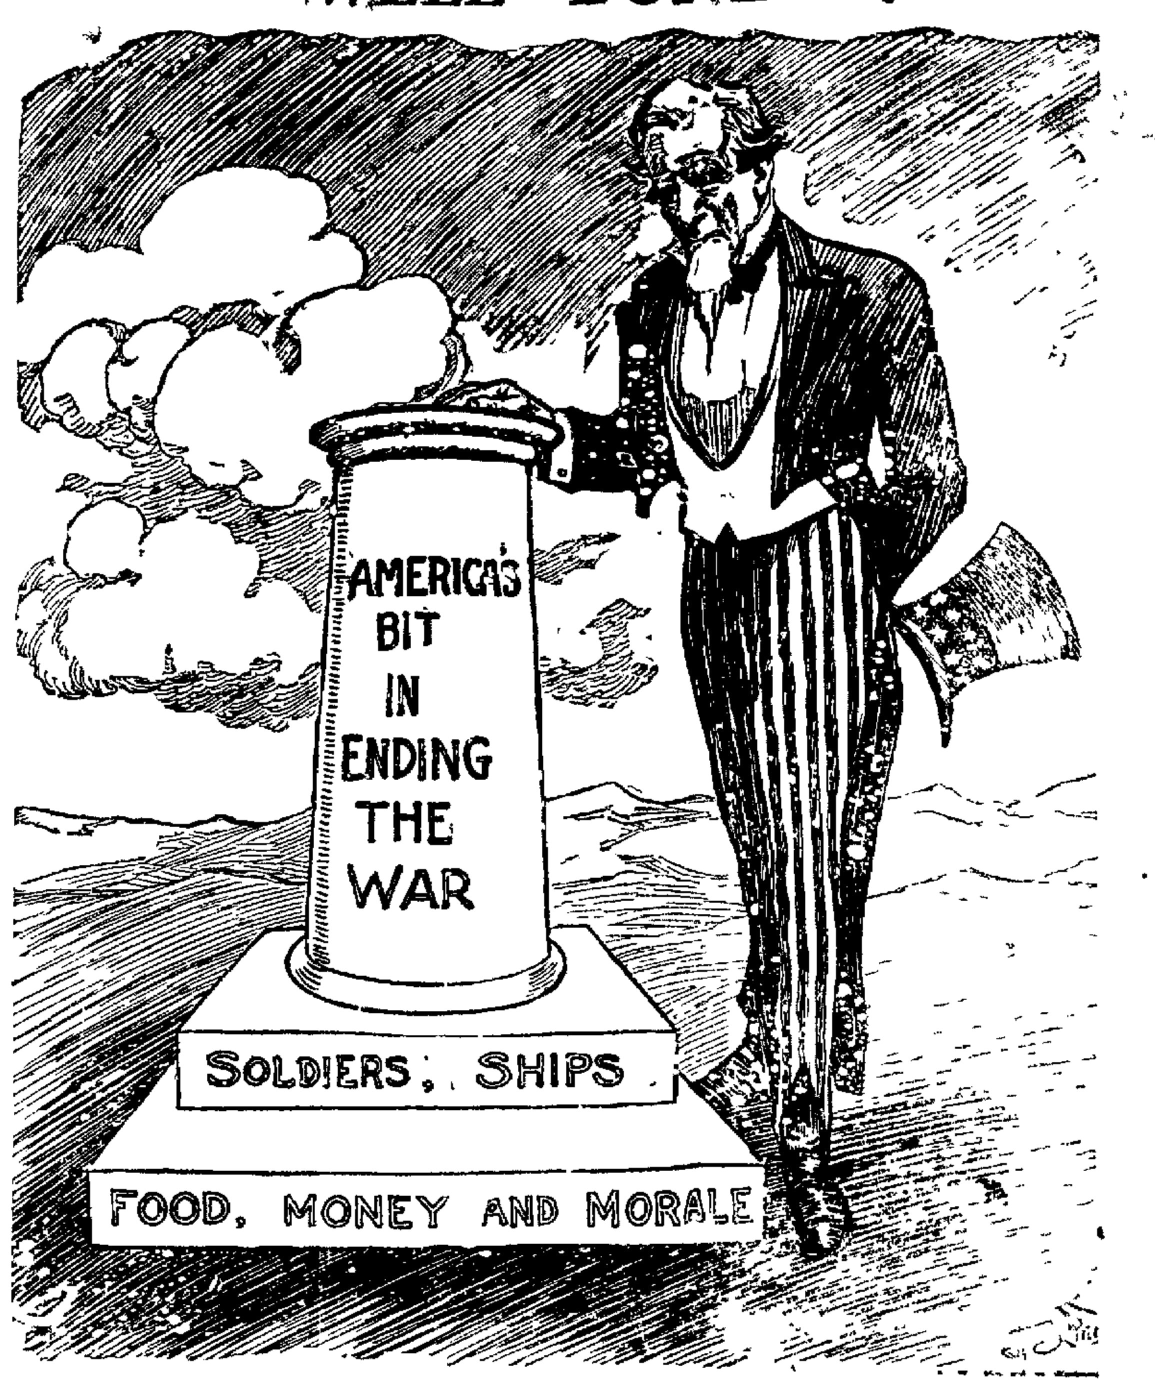

Folowing this latter change Mr Hagerty accepted the position of manager of the Hale Hardware establishment at Philipsburg where he remained for one year He then located at Latrobe, Pa, and managed the hardware business of a Mr Pores later removing to South Dakota where he spent one year and a half as a bank clerk

Tiring of the west he again returned to Clearfield and with the late R H Shaw embarked in the dry goods business in 1884 and continued in that business down to the time his eye sight failed him and he was forced to dispose of his store about one month ago

Mr Hagerty was a keen business man scrupulously honest in all his dealings and by dint of hard work and tireless energy built up a business and reputation second to none in our town and county His merchandise was always dependable his methods upright honest and trade winning and he retires now with not only a very comfortable share of this world's goods but what is more priceless than riches the reputation among his patrons and the people of Clearfield county generally of having taken advantage of no man in a business deal [illegible] full value for every dollar left with him [illegible]

He was [illegible] of the [illegible] merchants of Clearfield [illegible] and esteem [illegible] business competitor and the [illegible] general [illegible] legion [illegible] one that his physical [illegible] medical skill and he will soon be restored to his usual genial self

WATCH THE MILK SEPARATOR

Expert of Missouri College Offers Suggestions on Proper Operation of Machine.

Is the separator running all right? If not it should be looked after at once. L. W. Morley of the University of Missouri College of Agriculture offers the following suggestions on operating the separator: Be sure that the machine is level and securely fastened to a firm foundation. Remember that the speed of the separator is an important factor in its efficiency. If the crank is turned too slowly an excessive amount of fat will be left in the skim milk. The milk should not be allowed to enter the machine until full speed is attained.

A temperature of 90 degrees Fahrenheit is best for separation. If milk is cold when separated there is too much loss of fat. If the milk becomes cold it may be warmed by placing the can of milk in hot water. It is preferable, however, to separate the milk soon after it is drawn and before it becomes cold.

The separator should be kept clean if the highest efficiency of the machine and the best product is to be obtained. At the end of each separation flush out the bowl by pouring into the supply can about two quarts of luke-warm water. The parts may then be washed with warm water and then rinsed in scalding water, after which they should be allowed to dry.

SILO SOLVES FEED PROBLEM

Dairy Cattle Can Be Kept in Condition of Health Common to Animals on Good Pasture.

(Prepared by the United States Department of Agriculture.)

With silage in the ration, dairy cattle can be kept in the condition of health common to animals on pasture. The digestive system of a cow is well suited for the utilization of large quantities of green grasses and other coarse succulent material. Silage is palatable, and no other feed will combine so well with dry hay and a little grain to produce maximum, economical results.

The preservation of the mature corn crop or the saving of one which for any reason must be harvested before maturity by placing it in silos is deservedly increasing in popularity. About 40 per cent of the total food material in the corn plant is in the stalks and leaves. When only the ears are harvested nearly one-half of the crop is lost; on the other hand when the crop

Silo Helps Solve Winter Feed Problem on This Dairy Farm.

is put into the silo the losses are very small. When drought, frost or insects attack a field of corn before it is ripe the entire crop may be lost unless a silo is at hand in which to preserve it.

No feed crops can be so successfully harvested under widely varying conditions as those that are put into the silo. Only in case of drought or frost is it necessary to rush the filling of the silo; rain or dew on the forage does not injure the silage.

WORK OF BULL ASSOCIATIONS

Average Production of Sixteen Daughters Was 1,145 Pounds More of Milk—More Butterfat.

(Prepared by the United States Department of Agriculture.)

The results of co-operative bull-association work are encouraging. Of the 17 daughters of bulls in one association, 16 excelled their dams. The average production of the daughters was 1,145 pounds more milk than their dams, and 26.7 per cent more butterfat.

BULL ASSOCIATION BIG AID

Owner of Small Dairy Herd Enabled to Own a Share in a Good, Well-Bred Animal.

CHIC HENNA DUVETYN MODEL

Very new and chic is this stunning gown. It is fashioned in henna duvetyn with touches of black satin. The fur-edged collar and the wide band on the skirt are embroidered in black.

BROWNS AND WHO WEAR THEM

Popular Shades for Blondes and Brunettes of Any Type—Supply Is Adequate for All.

If more women had a finer appreciation of the part that color plays in making them attractive or unattractive, and in affecting their feelings, there would be a noticeable decrease in the list of the popular shades so-called, declares a fashion writer. Take for example the craze for tango color that possessed the feminine world not so very long ago. From lily white blonde to florid brunette everybody, or nearly everybody, managed to introduce tango somewhere on her person. The result? Well, that is best judged now that the craze is over.

However, there is still plenty of room for color crimes, for another season of brown is being prophesied. Now there are as many shades and hues and tints of brown as there are ladies to wear them. But somebody whispers that the red browns are decidedly to be the thing. Which means that all types and ages of women from the lily blonde of tender years to the sallow woman well past her first youth is going to go "in" for red brown, confident that she has Dame Fashion for a sponsor.

Now all types and all ages of women can find some one brown to suit, all except the mature woman who is inclined to be sallow. She may have the brown hair and the brown eyes; but she also has brown, unhealthily brown, skin, and she is not youthful; then brown is not for her.

The other types will choose as follows. The very fair blonde will choose from the green browns and the bronzes. Then the lovely redheads who seem to think that they have a monopoly on the color will look their best in the deeper, rich, dark tones of brown. Some of them if they are quite sure of themselves may attempt the tan-and-yellow browns. The betwixt-and-between girl who is neither quite blonde nor decidedly brunette will find the golden browns best, or perhaps those with a suggestion of pink in their make-up. The brunette who hasn't sufficient color to warrant her being called vivid is privileged to wear any shade of brown. She can go in for red browns to her heart's content, as may also the true brunette with olive skin and pink cheeks. Her more florid sister will appear to advantage in the golden browns.

VELVET IS REPLACING SATIN

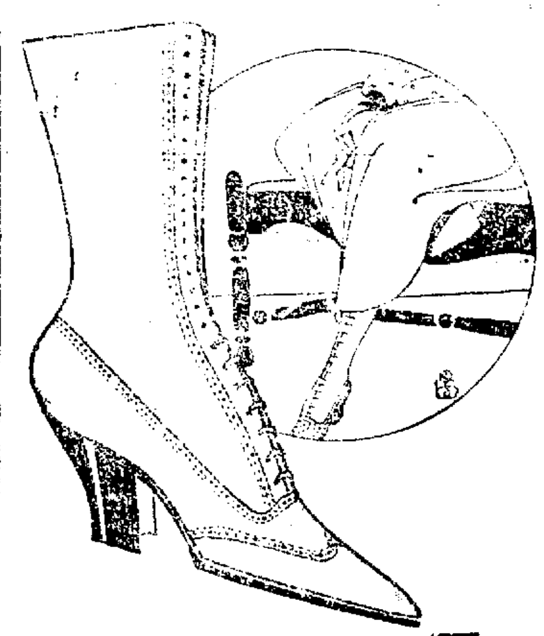

Only Material That Can Be Safely Worn Against Face Without Relief After Twenty.

More and more we notice velvet replacing satin. There is no fabric on earth which softens and beautifies like velvet. It is the kindest material in the world when it is placed next a woman's face and it is about the only material that is safely worn against the face without relief after one is over twenty.

One of the loveliest of velvet models is shown in black (good black velvet always looks like a million dollars). The waist has a deep V in front which extends at least nine inches below the waist. This is filled in with a Madonna blue georgette. The top of the georgette at the neck is cut square across. The V is then outlined with fur and the fur, of course, goes around the back of the neck.

The skirt is made with two tunics which open at the front. Both are outlined with the fur edge, the fur going around the bottom and then up to the waist. The sleeves are quite long over the hand, ... and without a bit of trimming. There is not a touch of embroidery or braiding ... on this frock and it is quite ... and distinctive.

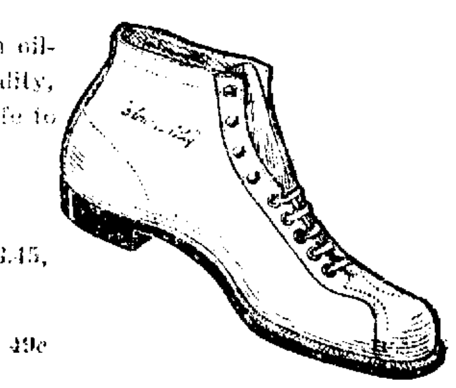

The Scandinavian countries were the first of Europe to sanction the ... political enfranchisement of women.

INFLUENZA UPSETS ALLOTMENT BUREAU

There has been a great deal of complaint to the Selective Service board the past few weeks regarding the failure of the soldier's allotment bureau to function properly and much dissatisfaction existed among dependents who were counting on receiving monthly cherks from the government.

Chief Clerk Bain took the matter up asd learned the cause of the delay, as the following telegrams will show:

Hon. Thomas B. Love,
Asst. Sec. of Treasury,
Washington, D. C.

Will you wire me reason why allotment and allowance checks were stopped in August period. Have on my desk record of about twenty-five cases of women in urgent need of their money who have had no remittances since August. Understand there are many more in this community. Justice to men in service to dependents at home and to the government would seem to demand some explanation if immediate relief of condition cannot be had.

JOHN M. BAIN

John M. Bain,

Checks referred to were delayed through demorilization of large force by influenza epidemic and concurrently unavoidable failure of addressograph machinery situation now remedied and checks rapidly going forward. Hope to be current within a few days.

NEW LISTS SHOW BIG INCREASE IN OUR CASUALTIES

Washington, Nov. 30—More than 28,000 names were added today to the total casualties of the American expeditionary force when General March gave out an amended report from General Pershing fixinl the official total to November 26 at 262,723 exclusive of prisoners.

General March said the total prisoners would probably be virtually the same—2163 as announced last Saturday. This would make the total casualties approximately 265,000.

War department delay in making known the casualties of the war will be made the subject of an investigation by the senate military committee beginning on Monday.

Flooded With Complaints

The committee has been flooded with complaints from anxious parents and other relatives of men at the front, who cannot obtain from the war department any information as whether the men they are most interested in are included in the thousands of dead and wounded which have not yet been announced.

The senate committee is convinced that there has been terrible mismanagement somewhere which is preventing mothers and fathers from learning whether their sons are safe, and that responsibility for such mismanagement should be established without less of time.

The revied totals can that there are still in France not less than 150,000 American soldiers, either dead or wounded who have not been accounted for by the war department.

28,363 Killed in Action

Genreal Pershing reports the following o cial casualties to November 26:

Killed in action 28,363.
Died of wounds, 12,101
Died of disease, 16,034.
Died of other causes 1980.
Missing in action 14,290.
Prisoners, (unintelligible.)
Wounded, 189,955, divided as follows:
Severely woundsd, 54,751
Undetermined 43,168
Slightly 92,036.

The war department expects to bring back home in the month of December between 150,000 and 175,000, General March said. To accomplish this is will use in addition to army transports and converted cargo boats enough old battleships and cruisers to furnish an additional carrying capacity for 25,000 men. Shipping experts expect to transport 300,000 monthly when the demobilization is under full speed.

The total number of troops already designated for early discharge in the United States is 649,000. These include depot and development battalions, 26,000; divisional troops, 10,000; railway troops, 28,000; United States guards, 26,000; tanks corps 7000; chemical warfare troops, 7000; central officers' traniing schools 20,000: student army training corps 160,000.

To date 46,378 men have been mustered out of the camps in this country. The schedule under which the department is working calls for the release of an average of 1000 men per camp per day and General March said that every effort would be made to maintain the average.

Revised army estimates for the coming year resulted in cutting the $19,000,000,000 of army appropriations to less than $3,000,000,000, General March announced.

NEW WAGE PLAN AFFECTS MANY

Men of Steelton Plant of Bethlehem Company Get a Substantial Increase.

RESULT OF EIGHT-HOUR DAY

Overtime Workers Benefit Largely by Revision—Employees to Have Opportunity to Confer With the Management Concerning Grievances.

Virtually every employee of the Steelton plant of the Bethlehem Steel company Harrisburg Pa, except the salaried men, is affected by a new plan of payment announced under which the eight hour day is introduced effective from October 1 last and providing time and half time pay for work done in excess of eight hours in any day.

Announcement also was made that a plan had been adopted whereby the employees will have means of bringing before the management problems affecting their working conditions.

It was stated at the Steelton offices that the eight hour day plan is similar to that recently adopted by the United States Steel corporation. The system of pay will result in material increases in the pay of men who work more than eight hours a day, but it is impossible even to approximate the aggregate amount of increase in the pay rolls.

GENERAL LABOR NEWS

There are 3,000 union machinists in Toronto Canada.

Canada's railway trades represent 150,000 workers.

Barbers at Kansas City Mo secured a ten and one half hour day.

White and colored shoe workers at Mobile, Ala have organized.

San Diego (Cal) mill men have secured an eight hour day.

A new union just formed includes all the retail grocery clerks in Fresno Cal.

At Sioux City Ia the new printers scale for day work calls for $27 and $30 for night work.

In England all private employment agencies have been discontinued since the outbreak of war.

The wage paid to the street cleaners and scavengers of Toronto is $18 per week and they demand $22.

Two policewomen are employed by Hendon (Eng) district council to patrol the streets and the public parks.

In the first year of the war possibly 10,000,000 working days were lost by strikes of organized labor workers.

All enemy aliens engaged as hairdressers in England have been ordered to find work of national importance.

A favorable report was ordered by the senate judiciary committee on the bill authorizing dry zones extending five miles around all coal mines.

That eastern Ohio will not fail to meet General Pershing's demand for 700,000 tons of coal weekly from this district was the sentiment expressed at a conference of labor leaders and operators called at Cleveland by Fuel Production Manager J J Roby.

Man power in many of the mines in the Westmoreland district in Pennsylvania has fallen off 15 and 20 per cent within the last year but by working six full days each week the men in the 200 mines expect to keep over a minimum production of 400,000 tons per week.

More than 3,000 members of the Boilermakers and Independent Shipbuilders' union quit work at Portland, Ore., in the shipyards taking a Saturday half holiday as a protest against the failure of the navy board to announce its decision on wages and working conditions.

The strike of 50 plumbers and steamfitters at the government munitions plant at Toledo O threatened to tie up all work at the institution. The men have been receiving the union scale of 68 cents an hour with time and a half for overtime. They demand a fraction over 84 cents an hour.

That labor unions must not by strike, interfere with the work of manufacturing war equipment, and that the long established principles that gave the unions the right to call strikes cannot now be applied is the decision of Justice Townsend Scudder handed down in the New York supreme court.

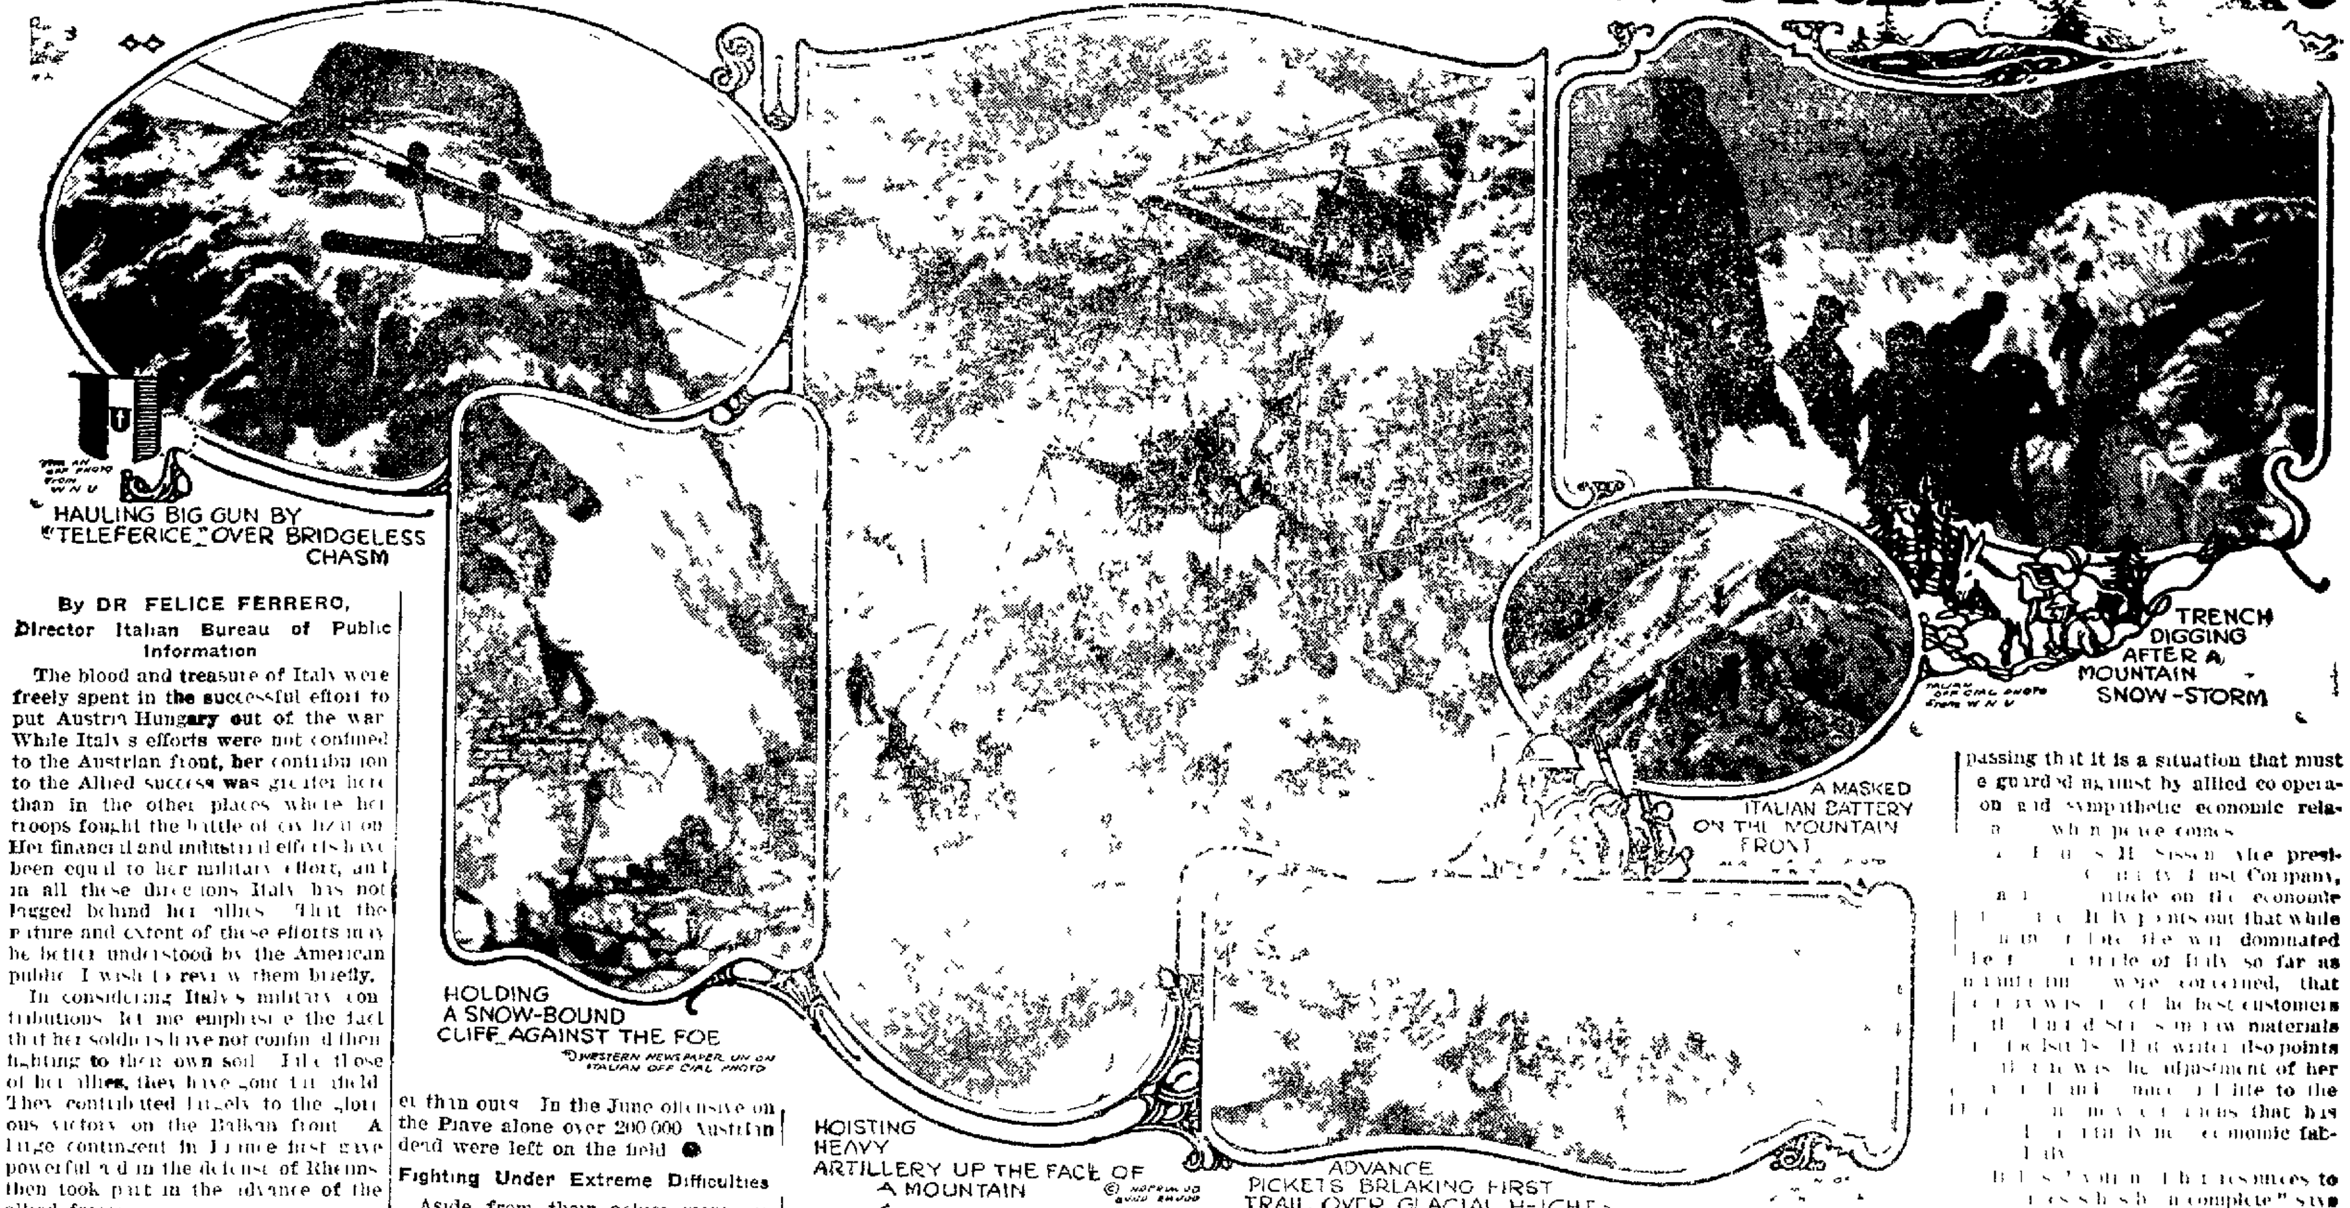

At a meeting of the workers who struck at the E W Bliss company's Brooklyn plant at New York at which torpedoes and shells are manufactured it was learned that the men walked out to support the demand of women employees for wages equal to those of the men. Estimates of the employees on strike range from 1,000 to 4,000. Most of the men strikers are of draft age and were given deferred classification.

Vancouver (B C) street car men are to receive a minimum of 40 cents an hour and a maximum of 51 cents an hour two years service to determine the maximum pay. They receive the eight-hour day and get time and a half for overtime.

The 150,000 shipyard workers in Pacific coast states have been ordered to remain at work Saturday afternoons by their respective iron trades councils despite efforts of unions in some quarters to declare a Saturday half holiday. ITALY'S EFFORTS IN THE WORLD WAR

HAULING BIG GUN BY "TELEFERICE" OVER BRIDGELESS CHASM

HOLDING A SNOW-BOUND CLIFF AGAINST THE FOE

HOISTING HEAVY ARTILLERY UP THE FACE OF A MOUNTAIN

ADVANCE PICKETS BREAKING FIRST TRAIL OVER GLACIAL HEIGHTS

A MASKED ITALIAN BATTERY ON THE MOUNTAIN FRONT

TRENCH DIGGING AFTER A MOUNTAIN SNOW-STORM

By DR FELICE FERRERO,
Director Italian Bureau of Public Information

The blood and treasure of Italy were freely spent in the successful effort to put Austria Hungary out of the war. While Italy's efforts were not confined to the Austrian front, her contribution to the Allied success was greater here than in the other places where her troops fought the battle of civilization. Her financial and industrial efforts have been equal to her military effort, and in all these directions Italy has not lagged behind her allies. That the nature and extent of these efforts may be better understood by the American public I wish to review them briefly.

In considering Italy's military contributions let me emphasize the fact that her soldiers have not confined their fighting to their own soil. Like those of her allies, they have gone far afield. They contributed largely to the glorious victory on the Balkan front. A large contingent in France first gave powerful aid in the defense of Rheims, then took part in the advance of the allied forces.

Italy Had 5,500,000 Under Arms.

Since the beginning of the war Italy has called to the colors little less than 5,500,000 men and has suffered a loss of almost 1,000,000 of them. Of that loss nearly 500,000 died in battle, and 100,000 from disease. Over 500,000 are totally incapacitated either by blindness, loss of limb or tuberculosis. At the present moment the strength of the Italian army is 4,025,000, including the class of men born in 1900, who have been called to the colors recently. It may be said, then, that the nation's man power has suffered a permanent loss of nearly a million.

But, serious as is this loss, Italy has inflicted an even greater punishment upon the foe. In Austrian prisoners alone she has taken approximately a million. The Austrian loss in killed and wounded is, of course, unknown to us, but even the most conservative estimates make it far greater than ours. In the June offensive on the Piave alone over 200,000 Austrian dead were left on the field.

Fighting Under Extreme Difficulties

Aside from their achievements in other theatres of the war Italy's soldiers have fought through full eleven furious offensives on the Isonzo and the Piave inflicting terrible losses on the foe in each. These campaigns were carried on in mountainous regions and under rigorous weather conditions that taxed to the utmost the genius of the military engineers and the endurance of the troops. The foe when hostilities opened, were entrenched in carefully prepared and seemingly impregnable positions, backed by a network of military roads and railroads. On the Italian side were deep gorges, unscalable cliffs almost impassable glaciers, passes filled with snow and commanded by Austrian guns. There were no suitable roads or bridges. The surmounting of these difficulties has challenged the admiration of the engineering world.

Over 2,500 miles of roads have been constructed on the mountains of Italy and of Albania, and 1,000 miles of [illegible] railroads (teleferiche) have been built to carry food, ammunition [illegible] over deep ravines.

For Itching Torture

There is one remedy that seldom fails to stop itching torture and relieve skin irritation and that makes the skin soft, clear and healthy.

Any druggist can supply you with zemo, which generally overcomes all skin diseases. Acne, eczema, itch, pimples, rashes, blackheads, in most cases give way to zemo. Frequently, minor blemishes disappear overnight. Itching usually stops instantly. Zemo is a safe, antiseptic liquid, clean, easy to use and dependable. It costs only 35c; an extra large bottle, $1.00. It will not stain, is not greasy or sticky and is positively safe for tender, sensitive skins.

HEAD STUFFED FROM CATARRH OR A COLD

Says Cream Applied in Nostrils Opens Air Passages Right Up

Instant relief—no waiting. Your clogged nostrils open right up; the air passages of your head clear and you can breathe freely. No more hawking, snuffling, blowing, headache, dryness. No struggling for breath at night; your cold or catarrh disappears.

Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant antiseptic, healing cream in your nostrils. It penetrates through every air passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly.

It's just fine. Don't stay stuffed up with a cold or nasty catarrh.

What Will Become Of The Ex-Kaiser

It Will Be Worth Your While to Make A Prophecy As To The Final Disposition of The Former Monarch.

After listening to the various sentences which people would have imposed on the late emperor of Germany we think that it will make interesting reading for the PROGRESS family. And to this end we offer to pay you for your time in predicting the final end of the dreamer of world conquest.

What To Write And How To Write It

Make your prophecy into a little story of 200 words—no more; less if you prefer. Tell what you think will be the ultimate end of William Hohenzollern, the former emperor of Germany, whether he will be exiled, be tried and condemned to death by an Allied court; whether he will be killed by his former subjects, etc.

CAUTION. Do not tell what you think **should** become of him but what will actually be the end of this universally hated man.

Write in ink on one side of the paper only. Sign your name plainly to avoid errors. Your name will not be used in print.

Match The Master Intellects of The World

In this proposition you are matching your judgment in this important matter against the judgment of the ruling powers of the world. The person who foretells or most nearly foretells the ultimate disposition of the Kaiser will receive a gift of Ten Dollars in recognition of his good judgment.

How Your Reply Will Be Handled

As soon as your prophecy is received it will be numbered by one of the office force, this person being the only one who will know which numbers are applied to the replies. Then your prophecy will be published over your number for the benefit of the PROGRESS reader family.

How The Correct Answer Will Be Determined

As soon as the official announcement is made of the disposition of the ex-kaiser we will appoint three disinterested judges and they will determine who really earns the $10. Of course, these men will make their decision from the **numbered replies only**.

The payment of the award may be delayed for some time awaiting the result of the decision as to the sentence imposed either by the people or the courts.

Conditions

While we want to keep this as free from confusing conditions as possible, things are happening so fast these days that there are a few conditions that will have to govern this two weeks of prognostication.

1. In case William meets his doom, or is tried and convicted before the time limit is up, only those replies received previous to the date of announcement will be considered.

2. The awarding of the prize is to be held up until such time as an official announcement is made as to the ultimate disposition of William.

3. If two persons should happen to prophesy the correct answer the judges must decide whose letter gives the clearest details concerning it. For instance, it is not enough to say the Kaiser will be exiled but the writer should give his judgment as to who will put him in exile and where, etc.

4. No employee of this paper, nor member of his family, may compete.

5. Only one prophecy will be allowed to each person, but as many members of the same family may write as wish.

Forum Open For Two Weeks

Opens Monday, December 2nd, And Closes Saturday, December 14th

This will give every person within the radius of the PROGRESS' circulation an opportunity to send in their prophecy.

The visitors report a good time, but the drive homeward was not so pleasant, as the terrific high wind made auto traveling rather dangerous, as trees were likely to be thrown across the roads at any minute. So strong did the wind blow out on the hills that it was nothing more than a miracle that the tops of the conveyances were not torn from their fastenings. The visitors were treated to a fine lunch before the start home and was made.

Some eastern hunters passed through Curwensville yesterday on their way to the barrens and to the deer hunting country around Penfield. All the home camps are filled already with local hunters from here and their friends from other sections. From indications and information brought in from the mountains yesterday, deer will be rather plentiful this season.

A GERMAN HOPE DISPROVED AND A GERMAN FEAR CONFIRMED

A statement made by a prominent German [illegible] soon after this country was declared in a state of war with Germany shows that even in the enemy country clear thinking students did not undervalue the strength of the American republic. Only in his confidence that we could not land in Europe sufficient troops to affect the final decision was this German mistaken.

"I do not fear the American soldiers," he told a high official of our government, "because they cannot arrive in time. What I fear is the intelligence and devotion of one hundred million original minds and people trained to a faith in individual initiative. The day that these people, now so materialistic in outward appearance, are stirred spiritually, that day is the day of Germany's doom."

KEEP LOOKING YOUNG

It's Easy—If You Know Dr. Edwards' Olive Tablets

The secret of keeping young is to feel young—to do this you must watch your liver and bowels—there's no need of having a sallow complexion—dark rings under your eyes—pimples—a bilious look in your face—dull eyes with no sparkle. Your doctor will tell you ninety per cent of all sickness comes from inactive bowels and liver.

Dr. Edwards, a well-known physician in Ohio, perfected a vegetable compound mixed with olive oil to act on the liver and bowels, which he gave to his patients for years.

Dr. Edwards' Olive Tablets, the substitute for calomel, are gentle in their action yet always effective. They bring about that exuberance of spirit, that natural buoyancy which should be enjoyed by everyone, by toning up the liver and clearing the system of impurities.

You will know Dr. Edwards' Olive Tablets by their olive color. 10c and 25c per box. All druggists.

PRESIDENT ADDRESSES CONGRESS IN ADVANCE OF EMBARKATION FOR THE PEACE CONFERENCE

TELLS CONGRESS HE FEELS IT HIS DUTY TO GO TO FRANCE AND ASKS BODY FOR THEIR ENCOURAGEMENT

LAYS DOWN RECONSTRUCTION PLAN

By United Press

WASHINGTON, D. C., Dec. 2—President Wilson spoke out today against return to the old conditions of rail operations in his annual message to the joint session opening the short term of "Reconstruction Congress" The President outlined this and other measures of his policies of re-adjustment At the same time he explained his peace trip to Europe as one that it was his "duty to make". "May I not hope," he added, "that in the delicate task I shall now have to perform I may have the encouragement and the added strength of your united support"

The President's re-adjustment program as outlined includes —

Passage of Women Suffrage

Use of existing Governmental agencies to effect readjustment

Immediate resumption of public work to provide employment for returning soldiers.

Ratification of the Columbia Treaty to include Pan American relations.

Immediate determination of taxes for 1918, 1919, and 1920, releasing as much of the burden of taxes from business as conditions will permit.

Priority of distribution of American raw material to the war stricken nations, complete consummation of a three year naval program; leaves determination of railway's future to Congress but recommends against return to the pre-war conditions of railvaycontrol. Urges that the railway control question be studied by Congress immeidately to quickly remove doubt of the future.

The President declared he believed that a final peace will be completed by spring. Meantime he said the American business man with his "quick initiative" is going ahead with his readjustment. He added that no system would work better than the present government agencies.

The President paid glowing tribute to the American soldiers and sailors and their part in the war. "It is not the physical scale and the executive efficiency of preparations, supplies, equipment and dispatch that I would dwell upon but the mettle and quality of the officers and men who went over, the sailors who kept the seas, and the spirit of the nation that stood behind them No soldiers or sailors ever proved themselves more quickly ready for the test of battle or acquitted themselves with more splendid courage and achievement when put to the test."

By United Press

WASHINGTON, D. C., Dec. 2.—Congress today expressed its displeasure because President Wilson had not taken the Legislative Branch into his confidence in peace matters Senator Cummings introduced a resolution to create a semi-committee of eight "to observe the peace negotiations * * * * and keep the Senate posted"

McADOO ESTIMATES GOVERNMENT EXPENSES FOR 1919 AT EIGHT BILLION

By United Press

WASHINGTON, D. C., Dec 2—Government expenditures for the next year were officially estimated today at $8,089,667,298 07 Secretary of the Treasury McAdoo transmitted today to the House of Representatives this estimate of the appropriations required for the various departments of the Government during the fiscal year ending June 30, 1920. It includes the sinking fund requirements, the postal service appropriation The total is $22,000 000 with the total estimate for 1919

WAR DEPARTMENT REPORT ON U. S PRISONERS IN GERMANY

(By United Press)

WASHINGTON, D C, Dec 2—Based on a report from General Pershing the War Department announced today that American prisoners released from German prison camps complained of scanty food and poor housing conditions 'American prisoners' said the statement, 'complain of poor and scanty food and bad housing conditions Only a small per cent of those who are sick are hospital cases. Many are suffering from slight colds Possibly all will recover rapidly with proper food and housing There is as yet no evidence of discrimination against Americans Among 7000 prisoners of all nationalities there have been no authenticated instances of brutality against Americans'

FOR GOLDEN RECORDS

Rome, Dec 2—Every municipality of Italy has just been invited by the government to open a Libro d'Oro' or "Golden Book" to the memory of all the inhabitants of each community who participated in the war

In addition to the name and address of each soldier there will be inscribed a full record of his promotions, his citations his decorations and also where the case so demands his death

Each community will keep its "Golden Book' as part of the permanent archives of the municipality

SPROUL SELECTION OF CABINET GOOD NEWS TO EVERYONE

Governor elect Sproul at his office in the Union League yesterday, announced that William I Schaffer of Delaware county would be the attorney general, Cyrus E Woods, of Westmoreland county the secretary of the commonwealth and Harry S McDevitt of Philadelphia his private secretary

In telling newspapermen the personnel of his cabinet the governor elect said

"I am not going into the political field up there with a mowing machine but I may need a weeder"

Sproul made it plain that the next speaker of the house must be dry" but, to use his own expression he "will not take the responsibility of a hand picked speaker" He was outspoken in his veiw that there has been too much interference from previous governors with thelegislative affairs

There was no announcement as to who will get the important position of state commissioner of health Dr Edward Martin of Philadelphia, formerly director of health and charities and who is now a member of the board of education, loomed up yesterday as the most likely of the aspirants for this post Doctor Martin is recognized as a leader in the medical profession and is a close friend of Senator Sproul

Dr John M Baldy, of Philadelphia is another candidate for this position whose claims have been urged upon the governor elect on account of his efficient work as president of the state bureau of medical education and licensure Altho his name has been frequently mentioned, Director Krusen of health and chearities, is not a candidate for the appointment

'William I Schaffer of Delaware county, will be my attorney general Sproul said yesterday afternoon, when interviewed upon the appointments he would make after he takes his office on January 21

'If W Harry Baker wanted to be secretary of the commonwealth there is no one in the state more entitled to the position He thinks and others also, that he can be of more service as secretary of the senate I think that there he can keep me in close touch with affairs, altho I do not intend to attempt to influence legislation If he wanted to be secretary of the commonwealth no one else would be considered I expect to tender the place to Cyrus E Woods, the present secretary

"Harry S McDevitt will be my secretary He knows the state He knows who's who and probably knows more about the government of the state than anyone now in office He will not attempt to be a deputy governor He will be an efficient secretary to the governor"

'Are other changes contemplated at Harrisburg" the governor elect was asked

Well he replied 'to use a homely farm expression 'I'm not going into the political field up there with a mowing machine but I may need a weeder

While George W Williams of Tioga county and Robert S Spangler of York county, apparently are most considered of the aspirants for the speakership Sproul yesterday was emphatic in saying that he would not pick the speaker The speaker must be dry' he indicated and in entire sympathy with the chief issues in the platform upon which the governor elect was chosen

Various gentlemen of large influence said Sproul have suggested that my wishes would be considered [illegible] the speakership I want to [illegible] any interference with legislative affairs in the state government There has been too much [illegible] thing in the past

The house will have to [illegible] own speaker but the man who [illegible] to be in sympathy with the chief issues of my platform I will not take the responsibility for any hand picked speaker."

HAGERTY BLOCK SOLD TO COUNTY NATIONAL BANK

A. J. Hagerty Retires From His Business With Respect and Esteem Of All People

BANK TO ENLARGE FACILITIES

As the culmination of a couple of important business deals just completed the County National Bank becomes the owner of the A J Hagerty block on Second street and as soon as conditions warrant the present Hagerty dry goods store room will be remodeled and become a part of the bank building

The rapidly increasing business of the County National the past few years has made an addition to their present commodious building a necessity and when the Hagerty property changed hands recently the bank saw their opportunity and succeeded in acquiring title to same from Archie Desling of Woodland, who recently purchased building and contents from Mr Hagerty who was forced to retire from active business by reason of failing eye sight

Plans have not been entirely completed thus far, but Clearfield people may expect to see one of the most modern and uptodate bank buildings in this section before many months go by

The retirement of A J Hagerty from the retail dry goods business marks the passing of one of Clearfield's oldest (in point of continuous business) and best known business men from our business life Mr Hagerty began his business career at the age of 16 years as a clerk in the general store of James B Graham & Co back in 1868 He continued with this firm until their retirement from business and then secured a position with Miller & Powell's hardware store and continued in their service until the store was purchased by H R Bigler He continued with Mr Bigler until the hardware business was again purchased by William Powell, father of the present W F Powell

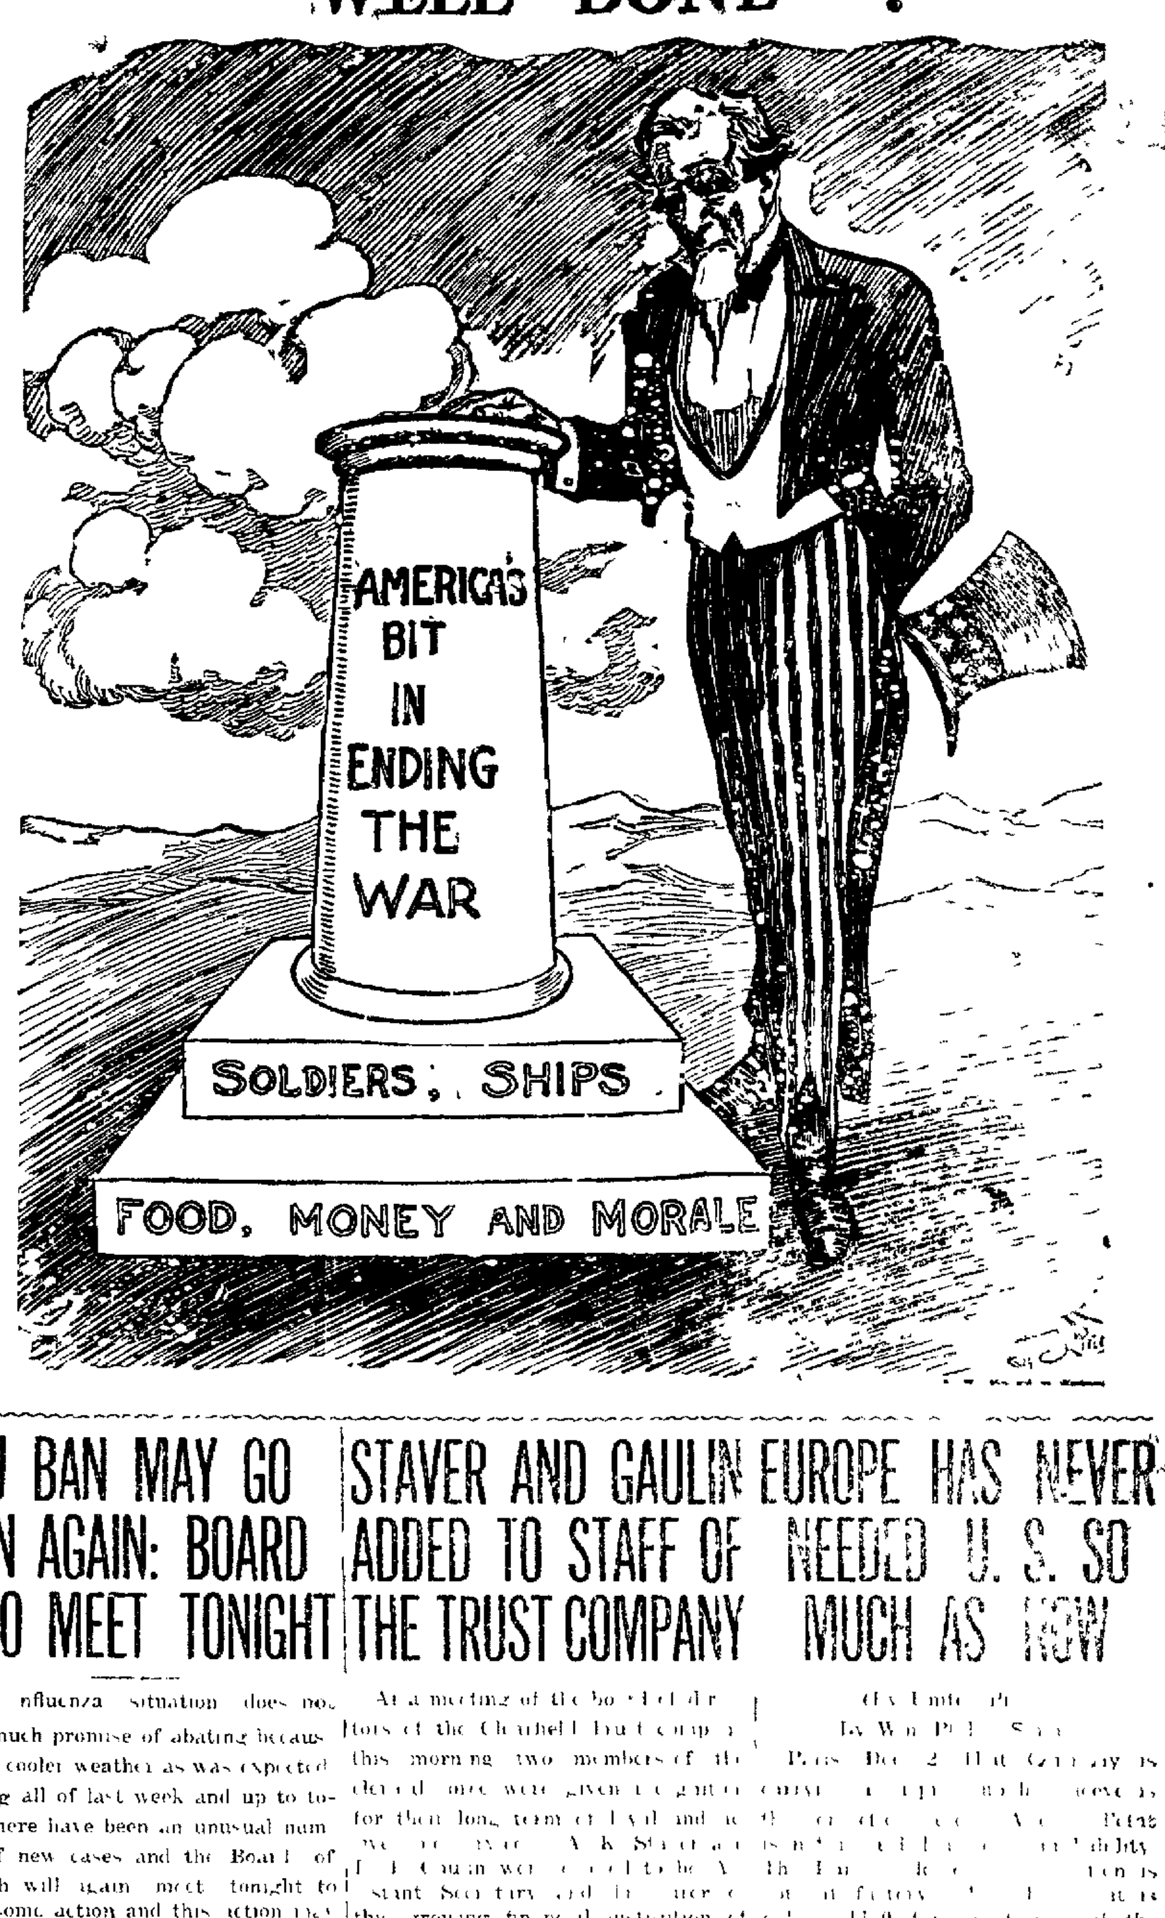

Following this latter change Mr Hagerty accepted the position of manager of the Hale Hardware establishment at Philipsburg where he remained for one year He then located at Latrobe, Pa, and managed the hardware business of a Mr Pores later removing to South Dakota where he spent one year and a half as a bank clerk

Tiring of the west he again returned to Clearfield and with the late R H Shaw embarked in the dry goods business in 1884 and continued in that business down to the time his eye sight failed him and he was forced to dispose of his store about one month ago

Mr Hagerty was a keen business man scrupulously honest in all his dealings and by dint of hard work and tireless energy built up a business and reputation second to none in our town and county His merchandise was always dependable his methods upright honest and trade winning and he retires now with not only a very comfortable share of this world goods but what is more priceless than riches the reputation among his patrons and the people of Clearfield county generally of having taken advantage of no man in a business deal given full value for every dollar left with him [illegible]

He was [illegible] of the [illegible] merchants of Clearfield [illegible] and [illegible] business competitor and the [illegible] that his physical ailment will [illegible] medical skill and he will soon be restored to his usual genial self

WATCH THE MILK SEPARATOR

Expert of Missouri College Offers Suggestions on Proper Operation of Machine.

Is the separator running all right? If not it should be looked after at once. L. W. Morley of the University of Missouri College of Agriculture offers the following suggestions on operating the separator: Be sure that the machine is level and securely fastened to a firm foundation. Remember that the speed of the separator is an important factor in its efficiency. If the crank is turned too slowly an excessive amount of fat will be left in the skim milk. The milk should not be allowed to enter the machine until full speed is attained.

A temperature of 90 degrees Fahrenheit is best for separation. If milk is cold when separated there is too much loss of fat. If the milk becomes cold it may be warmed by placing the can of milk in hot water. It is preferable, however, to separate the milk soon after it is drawn and before it becomes cold.

The separator should be kept clean if the highest efficiency of the machine and the best product is to be obtained. At the end of each separation flush out the bowl by pouring into the supply can about two quarts of luke-warm water. The parts may then be washed with warm water and then rinsed in scalding water, after which they should be allowed to dry.

SILO SOLVES FEED PROBLEM

Dairy Cattle Can Be Kept in Condition of Health Common to Animals on Good Pasture.

(Prepared by the United States Department of Agriculture.)

With silage in the ration, dairy cattle can be kept in the condition of health common to animals on pasture. The digestive system of a cow is well suited for the utilization of large quantities of green grasses and other coarse succulent material. Silage is palatable, and no other feed will combine so well with dry hay and a little grain to produce maximum, economical results.

The preservation of the mature corn crop or the saving of one which for any reason must be harvested before maturity by placing it in silos is deservedly increasing in popularity. About 40 per cent of the total food material in the corn plant is in the stalks and leaves. When only the ears are harvested nearly one-half of the crop is lost; on the other hand when the crop

Silo Helps Solve Winter Feed Problem on This Dairy Farm.

is put into the silo the losses are very small. When drought, frost or insects attack a field of corn before it is ripe the entire crop may be lost unless a silo is at hand in which to preserve it.

No feed crops can be so successfully harvested under widely varying conditions as those that are put into the silo. Only in case of drought or frost is it necessary to rush the filling of the silo; rain or dew on the forage does not injure the silage.

WORK OF BULL ASSOCIATIONS

Average Production of Sixteen Daughters Was 1,145 Pounds More of Milk—More Butterfat.

(Prepared by the United States Department of Agriculture.)

The results of co-operative bull-association work are encouraging. Of the 17 daughters of bulls in one association, 16 excelled their dams. The average production of the daughters was 1,145 pounds more milk than their dams, and 26.7 per cent more butterfat.

CHIC HENNA DUVETYN MODEL

Very new and chic is this stunning gown. It is fashioned in henna duvetyn with touches of black satin. The fur-edged collar and the wide band on the skirt are embroidered in black.

BROWNS AND WHO WEAR THEM

Popular Shades for Blondes and Brunettes of Any Type—Supply Is Adequate for All.

If more women had a finer appreciation of the part that color plays in making them attractive or unattractive, and in affecting their feelings, there would be a noticeable decrease in the list of the popular shades so-called, declares a fashion writer. Take for example the craze for tango color that possessed the feminine world not so very long ago. From lily white blonde to florid brunette everybody, or nearly everybody, managed to introduce tango somewhere on her person. The result? Well, that is best judged now that the craze is over.

However, there is still plenty of room for color crimes, for another season of brown is being prophesied. Now there are as many shades and hues and tints of brown as there are ladies to wear them. But somebody whispers that the red browns are decidedly to be the thing. Which means that all types and ages of women from the Heady blonde of tender years to the sallow woman well past her first youth is going to go "in" for red brown, confident that she has Dame Fashion for a sponsor.

Now all types and all ages of women can find some one brown to suit, all except the mature woman who is inclined to be sallow. She may have the brown hair and the brown eyes; but she also has brown, unhealthily brown, skin, and she is not youthful; then brown is not for her.

The other types will choose as follows. The very fair blonde will choose from the green browns and the bronzes. Then the lovely redheads who seem to think that they have a monopoly on the color will look their best in the deeper, rich, dark tones of brown. Some of them if they are quite sure of themselves may attempt the tan-and-yellow browns. The betwixt-and-between girl who is neither quite blonde nor decidedly brunette will find the golden browns best, or perhaps those with a suggestion of pink in their make-up. The brunette who hasn't sufficient color to warrant her being called vivid is privileged to wear any shade of brown. She can go in for red browns to her heart's content, as may also the true brunette with olive skin and pink cheeks. Her more florid sister will appear to advantage in the golden browns.

VELVET IS REPLACING SATIN

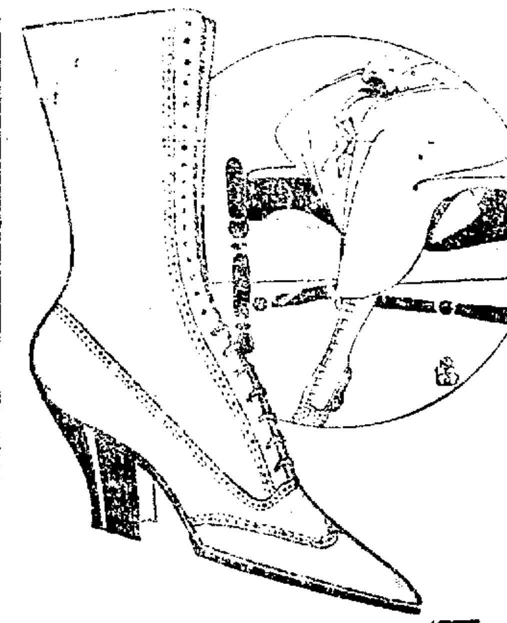

Only Material That Can Be Safely Worn Against Face Without Relief After Twenty.

More and more we notice velvet replacing satin. There is no fabric on earth which softens and beautifies like velvet. It is the kindest material in the world when it is placed next a woman's face and it is about the only material that is safely worn against the face without relief after one is over twenty.

One of the loveliest of velvet models is shown in black (good black velvet always looks like a million dollars). The waist has a deep V in front which extends at least nine inches below the waist. This is filled in with a Madonna blue georgette. The top of the georgette at the neck is cut square across. The V is then outlined with fur and the fur, of course, goes around the back of the neck.

The skirt is made with two tunics which open at the front. Both are outlined with this fur edge, the fur going around the bottom and then up to the waist. The sleeves are quite long over the hand, ... and without a bit of trimming. There is not a touch of embroidery or braiding of any kind on this frock and it is quite ... and distinctive.

The Scandinavian countries were the first of Europe to sanction the ... political enfranchisement of women.

INFLUENZA UPSETS ALLOTMENT BUREAU

There has been a great deal of complaint to the Selective Service board the past few weeks regarding the failure of the soldier's allotment bureau to function properly and much dissatisfaction existed among dependents who were counting on receiving monthly cherks from the government.

Chief Clerk Bain took the matter up asd learned the cause of the delay, as the following telegrams will show:

Hon. Thomas B. Love,
Asst. Sec. of Treasury,
Washington, D. C.

Will you wire me reason why allotment and allowance checks were stopped in August period. Have on my desk record of about twenty-five cases of women in urgent need of their money who have had no remittances since August. Understand there are many more in this community. Justice to men in service to dependents at home and to the government would seem to demand some explanation if immediate relief of condition cannot be had.

JOHN M. BAIN

John M. Bain,

Checks referred to were delayed through demorilization of large force by influenza epidemic and concurrently unavoidable failure of addressograph machinery situation now remedied and checks rapidly going forward. Hope to be current within a few days.

THOMAS B. LOVE

NEW LISTS SHOW BIG INCREASE IN OUR CASUALTIES

Washington, Nov. 30—More than 28,000 names were added today to the total casualties of the American expeditionary force when General March gave out an amended report from General Pershing fixinl the official total to November 26 at 262,723 exclusive of prisoners.

General March said the total prisoners would probably be virtually the same—2163 as announced last Saturday. This would make the total casualties approximately 265,000.

War department delay in making known the casualties of the war will be made the subject of an investigation by the senate military committee beginning on Monday.

Flooded With Complaints

The committee has been flooded with complaints from anxious parents and other relatives of men at the front, who cannot obtain from the war department any information as whether the men they are most interested in are included in the thousands of dead and wounded which have not yet been announced.

The senate committee is convinced that there has been terrible mismanagement somewhere which is preventing mothers and fathers from learning whether their sons are safe, and that responsibility for such mismanagement should be established without less of time.

The revied totals can that there are still in France not less than 150,000 American soldiers, either dead or wounded who have not been accounted for by the war department.

28,363 Killed in Action

Genreal Pershing reports the following o cial casualties to November 26:

Killed in action 28,363.
Died of wounds, 12,101
Died of disease, 16,034.
Died of other causes 1980.
Missing in action 14,290.
Prisoners, (unintelligible.)
Wounded, 189,955, divided as follows:
Severely woundsd, 54,751
Undetermined 43,168
Slightly 92,036.

The war department expects to bring back home in the month of December between 150,000 and 175,000, General March said. To accomplish this is will use in addition to army transports and converted cargo boats enough old battleships and cruisers to furnish an additional carrying capacity for 25,000 men. Shipping experts expect to transport 300,000 monthly when the demobilization is under full speed.

The total number of troops already designated for early discharge in the United States is 649,000. These include depot and development battalions, 26,000; divisional troops, 10,000; railway troops, 28,000; United States guards, 26,000; tanks corps 7000; chemical warfare troops, 7000; central officers' traniing schools 20,000: student army training corps 160,000.

To date 46,378 men have been mustered out of the camps in this country. The schedule under which the department is working calls for the release of an average of 1000 men per camp per day and General March said that every effort would be made to maintain the average.

Revised army estimates for the coming year resulted in cutting the $19,000,000,000 of army appropriations to less than $3,000,000,000, General March announced.

NEW WAGE PLAN AFFECTS MANY

Men of Steelton Plant of Bethlehem Company Get a Substantial Increase.

RESULT OF EIGHT-HOUR DAY

Overtime Workers Benefit Largely by Revision—Employees to Have Opportunity to Confer With the Management Concerning Grievances.

Virtually every employee of the Steelton plant of the Bethlehem Steel company Harrisburg Pa, except the salaried men, is affected by a new plan of payment announced under which the eight hour day is introduced effective from October 1 last and providing time and half time pay for work done in excess of eight hours in any day.

Announcement also was made that a plan had been adopted whereby the employees will have means of bringing before the management problems affecting their working conditions.

It was stated at the Steelton offices that the eight hour day plan is similar to that recently adopted by the United States Steel corporation. The system of pay will result in material increases in the pay of men who work more than eight hours a day, but it is impossible even to approximate the aggregate amount of increase in the pay rolls.

GENERAL LABOR NEWS

There are 3,000 union machinists in Toronto Canada.

Canada's railway trades represent 150,000 workers.

Barbers at Kansas City Mo secured a ten and one half hour day.

White and colored shoe workers at Mobile, Ala have organized.

San Diego (Cal) mill men have secured an eight hour day.

A new union just formed includes all the retail grocery clerks in Fresno Cal.

At Sioux City Ia the new printers scale for day work calls for $27 and $30 for night work.

In England all private employment agencies have been discontinued since the outbreak of war.

The wage paid to the street cleaners and scavengers of Toronto is $18 per week and they demand $22.

Two policewomen are employed in Hendon (Eng) district council to patrol the streets and the public parks.

In the first year of the war possibly 10,000,000 working days were lost by strikes of organized labor workers.

All enemy aliens engaged as hairdressers in England have been ordered to find work of national importance.

A favorable report was ordered by the senate judiciary committee on the bill authorizing dry zones extending five miles around all coal mines.

That eastern Ohio will not fail to meet General Pershing's demand for 700,000 tons of coal weekly from this district was the sentiment expressed at a conference of labor leaders and operators called at Cleveland by Fuel Production Manager J J Roby.

Man power in many of the mines in the Westmoreland district in Pennsylvania has fallen off 15 and 20 per cent within the last year but by working six full days each week the men in the 200 mines expect to keep over a minimum production of 400,000 tons per week.

More than 3,000 members of the Boilermakers and Independent Shipbuilders' union quit work at Portland, Ore., in the shipyards taking a Saturday half holiday as a protest against the failure of the navy board to announce its decision on wages and working conditions.

The strike of 50 plumbers and steamfitters at the government munitions plant at Toledo O threatened to tie up all work at the institution. The men have been receiving the union scale of 68 cents an hour with time and a half for overtime. They demand a fraction over 84 cents an hour.

That labor unions must not by strike, interfere with the work of manufacturing war equipment, and that the long established principles that gave the unions the right to call strikes cannot now be applied is the decision of Justice Townsend Scudder handed down in the New York supreme court.

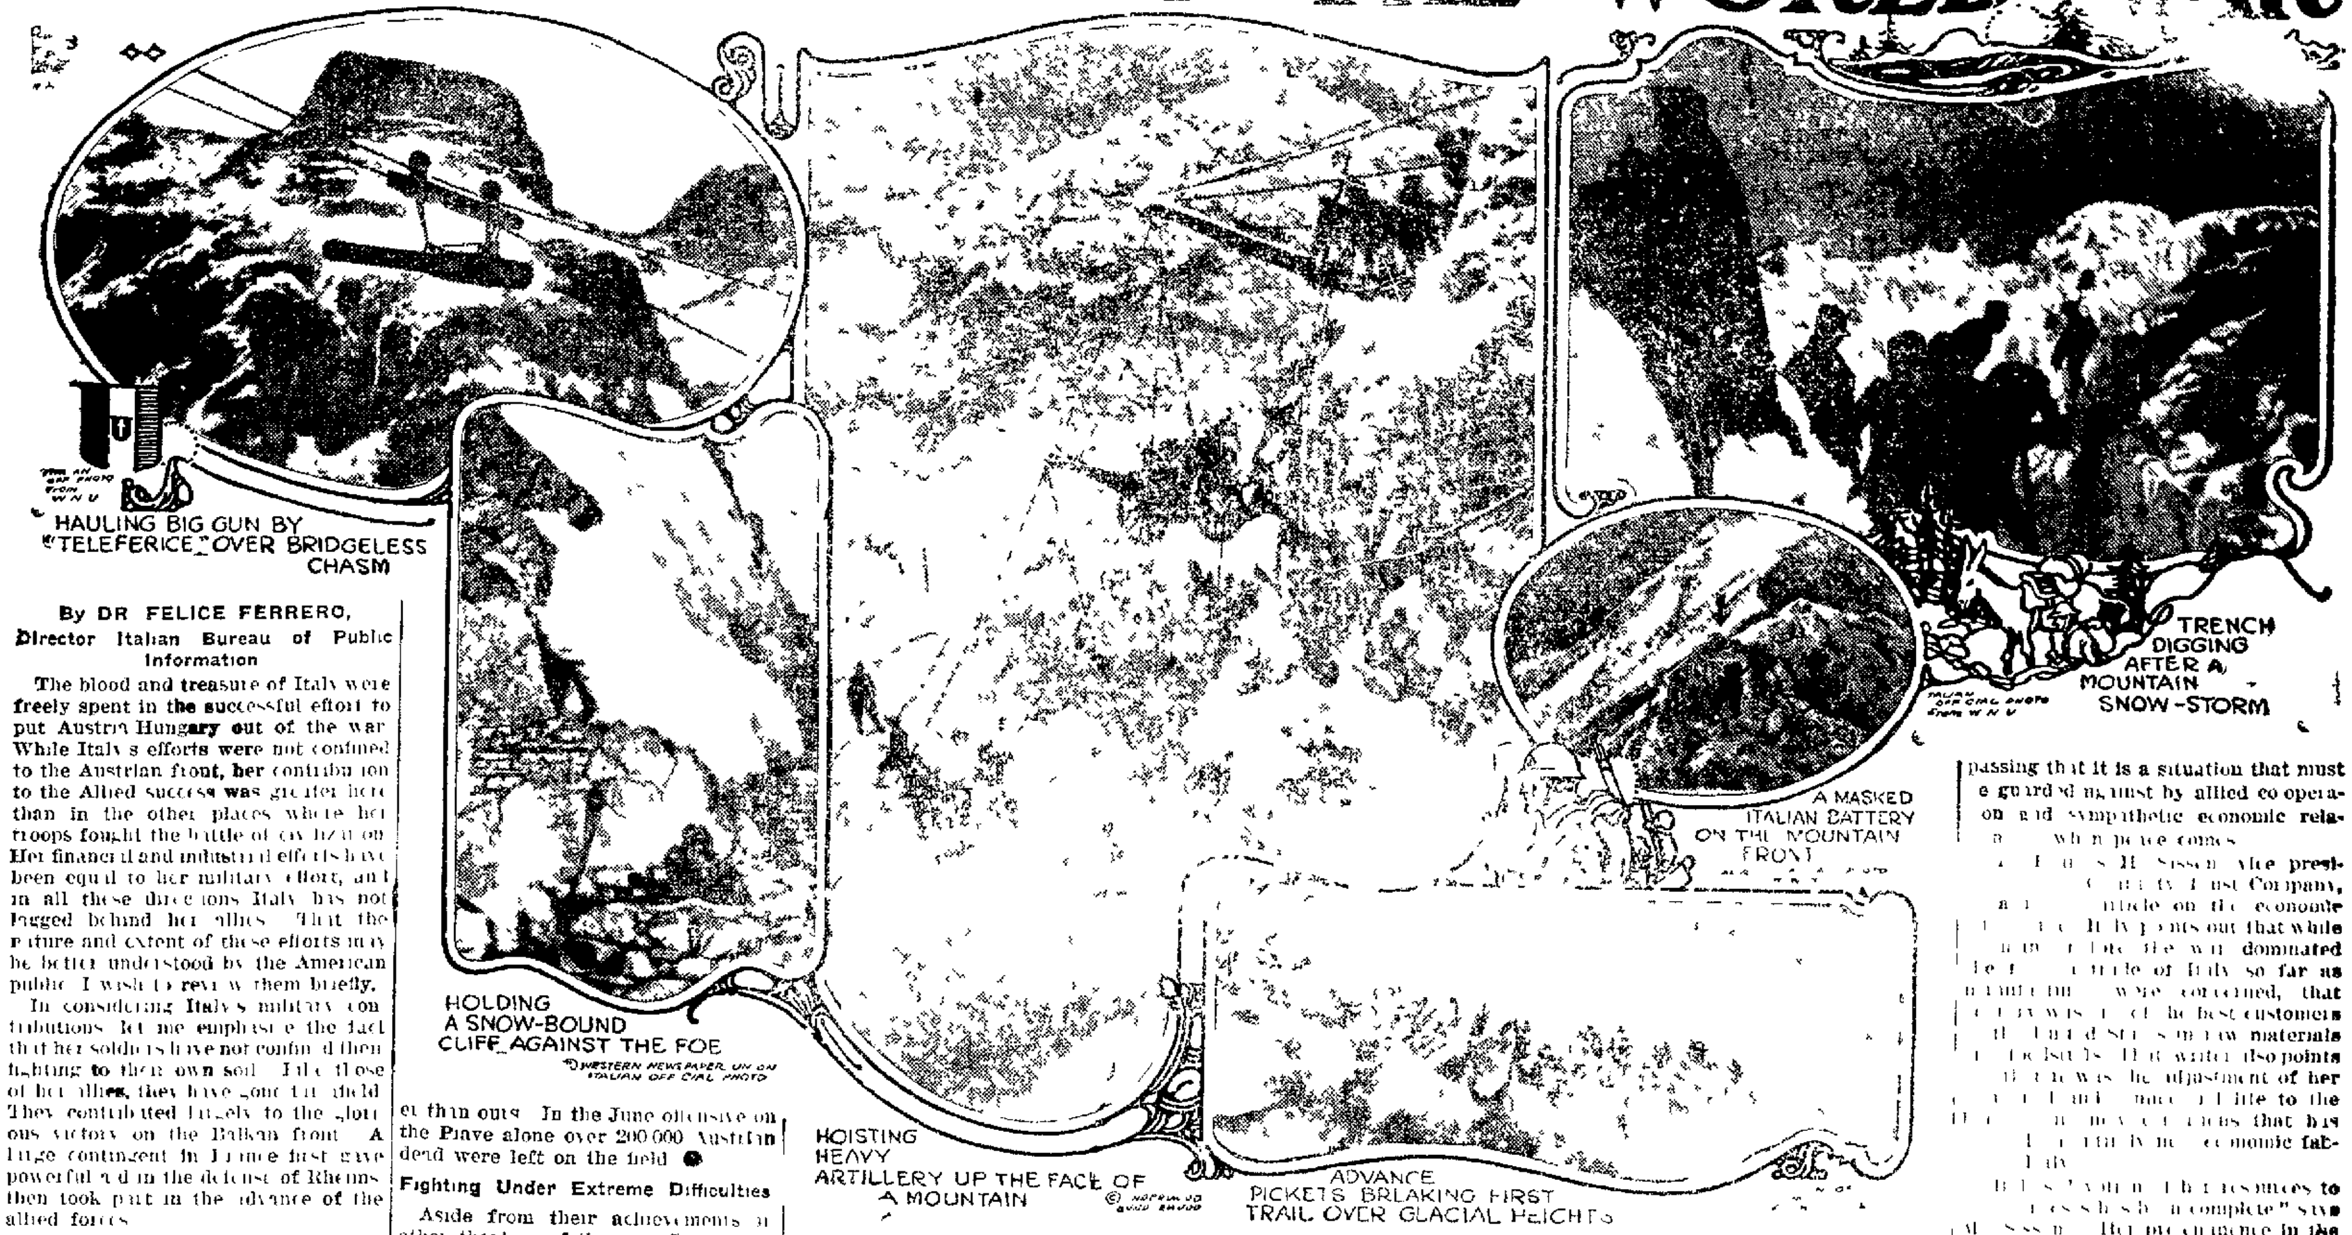

At a meeting of the workers who struck at the E W Bliss company's Brooklyn plant at New York at which torpedoes and shells are manufactured it was learned that the men walked out to support the demand of women employees for wages equal to those of the men. Estimates of the employees on strike range from 1,000 to 1,000. Most of the men strikers are of draft age and were given deferred classification.

Vancouver (B C) street car men are to receive a minimum of 40 cents an hour and a maximum of 51 cents an hour two years service to determine the maximum pay. They receive the eight-hour day and get time and a half for overtime.

The 150,000 shipyard workers in Pacific coast states have been ordered to remain at work Saturday afternoons by their respective iron trades councils, [illegible] of unions in some quarters to declare a Saturday half holiday. [illegible] secretary of the San Francisco Iron Trades council announced.

ITALY'S EFFORTS IN THE WORLD WAR

By DR FELICE FERRERO,
Director Italian Bureau of Public Information

The blood and treasure of Italy were freely spent in the successful effort to put Austria Hungary out of the war. While Italy's efforts were not confined to the Austrian front, her contribution to the Allied success was greater here than in the other places where her troops fought the battle of civilization. Her financial and industrial efforts have been equal to her military effort, and in all these directions Italy has not lagged behind her allies. That the nature and extent of these efforts may be better understood by the American public I wish to review them briefly.

In considering Italy's military contributions let me emphasize the fact that her soldiers have not confined their fighting to their own soil. Like those of her allies, they have gone far afield. They contributed largely to the glorious victory on the Balkan front. A large contingent in France first gave powerful aid in the defense of Rheims, then took part in the advance of the allied forces.

Italy Had 5,500,000 Under Arms.

Since the beginning of the war Italy has called to the colors little less than 5,500,000 men and has suffered a loss of almost 1,000,000 of them. Of that loss nearly 500,000 died in battle, and 100,000 from disease. Over 500,000 are totally incapacitated either by blindness, loss of limb or tuberculosis. At the present moment the strength of the Italian army is 4,025,000, including the class of men born in 1900, who have been called to the colors recently. It may be said, then, that the nation's man power has suffered a permanent loss of nearly a million.

But, serious as is this loss, Italy has inflicted an even greater punishment upon the foe. In Austrian prisoners alone she has taken approximately a million. The Austrian loss in killed and wounded is, of course, unknown to us, but even the most conservative estimates make it far greater than ours. In the June offensive on the Piave alone over 200,000 Austrian dead were left on the field.

Fighting Under Extreme Difficulties

Aside from their achievements in other theatres of the war Italy's soldiers have fought through [illegible] furious offensives on the Isonzo and the Piave inflicting terrible losses on the foe in each. These campaigns were carried on in mountainous regions and under rigorous weather conditions that taxed to the utmost the genius of the military engineers and the endurance of the troops. The foe when hostilities opened, were entrenched in [illegible] fully prepared and seemingly impregnable positions, backed by a network of military roads and railroads. On the Italian side were deep gorges, unscalable cliffs almost impossible glaciers, passes filled with snow and commanded by Austrian guns. There were no suitable roads or bridges. The surmounting of these difficulties has challenged the admiration of the engineering world.

Over 2,500 miles of roads have been constructed on the mountains of Italy and of Albania, and 1,000 miles of [illegible] railroads (teleferiche) have been built to carry food, ammunition [illegible] over deep ravines.

Economic Difficulties

[illegible]

No Troops From Colonies

Italy got no help from colonial contingents. On the contrary the scarcity of native troops in Italy's colonies compelled the government to reinforce them with troops from the mother country. Nor has help come to Italy through the co-operation of workmen of neutral or allied countries. Italy on the other hand sent a large contingent of skilled workmen to France, thus allowing her to release valuable elements for war. What Will Become Of The Ex-Kaiser

It Will Be Worth Your While to Make A Prophecy As To The Final Disposition of The Former Monarch.

After listening to the various sentences which people would have imposed on the late emperor of Germany we think that it will make interesting reading for the PROGRESS family. And to this end we offer to pay you for your time in predicting the final end of the dreamer of world conquest.

What To Write And How To Write It

Make your prophecy into a little story of 200 words—no more; less if you prefer. Tell what you think will be the ultimate end of William Hohenzollern, the former emperor of Germany, whether he will be exiled, be tried and condemned to death by an Allied court; whether he will be killed by his former subjects, etc.

CAUTION. Do not tell what you think **should** become of him but what will actually be the end of this universally hated man.

Write in ink on one side of the paper only. Sign your name plainly to avoid errors. Your name will not be used in print.

Match The Master Intellects of The World

In this proposition you are matching your judgment in this important matter against the judgment of the ruling powers of the world. The person who foretells or most nearly foretells the ultimate disposition of the Kaiser will receive a gift of Ten Dollars in recognition of his good judgment.

How Your Reply Will Be Handled

As soon as your prophecy is received it will be numbered by one of the office force, this person being the only one who will know which numbers are applied to the replies. Then your prophecy will be published over your number for the benefit of the PROGRESS reader family.

How The Correct Answer Will Be Determined

As soon as the official announcement is made of the disposition of the ex-kaiser we will appoint three disinterested judges and they will determine who really earns the $10. Of course, these men will make their decision from the **numbered replies only**.

The payment of the award may be delayed for some time awaiting the result of the decision as to the sentence imposed either by the people or the courts.

Conditions

While we want to keep this as free from confusing conditions as possible, things are happening so fast these days that there are a few conditions that will have to govern this two weeks of prognostication.

1. In case William meets his doom, or is tried and convicted before the time limit is up, only those replies received previous to the date of announcement will be considered.

2. The awarding of the prize is to be held up until such time as an official announcement is made as to the ultimate disposition of William.

3. If two persons should happen to prophesy the correct answer the judges must decide whose letter gives the clearest details concerning it. For instance, it is not enough to say the Kaiser will be exiled but the writer should give his judgment as to who will put him in exile and where, etc.

4. No employee of this paper, nor member of his family, may compete.

5. Only one prophecy will be allowed to each person, but as many members of the same family may write as wish.

Forum Open For Two Weeks

Opens Monday, December 2nd, And Closes Saturday, December 14th

This will give every person within the radius of the PROGRESS' circulation an opportunity to send in their prophecy.

From a letter received from Al Whittaker, son of Law Whittaker who is a member of Battery C 12 [illegible] Field artillery, it is learned that he was wounded in his left leg while in a [illegible] on October 2nd and is now in one of the hospitals. Also has been in every battle in which his battery has taken part, some of the engagements being severe.

The degree team of Bethesda Lodge No. 821, I. O. O. F. of this place went to Troutville Saturday evening and conferred several degrees on candidates for Mingle lodge. The visitors report a good time, but the drive homeward was not so pleasant, as the terrific high wind made auto traveling rather dangerous, as trees were likely to be thrown across the roads at any minute. So strong did the wind blow out on the hills that it was nothing more than a miracle that the tops of the conveyances were not torn from their fastenings. The visitors were treated to a fine lunch before the start home and was made.

[illegible] one of a party that went to the knobs for a week's deer hunt. Some eastern hunters passed through Curwensville yesterday on their way to the barrens and to the deer hunting country around Penfield. All the home camps are filled already with local hunters from here and their friends from other sections. From indications and information brought in from the mountains yesterday, deer will be rather plentiful this season.

A GERMAN HOPE DISPROVED AND A GERMAN FEAR CONFIRMED

A statement made by a prominent German [illegible] soon after this country was declared in a state of war with Germany shows that even in the enemy country clear thinking students did not undervalue the strength of the American republic. Only in his confidence that we could not land in Europe sufficient troops to affect the final decision was this German mistaken.

"I do not fear the American soldiers," he told a high official of our government, "because they cannot arrive in time. What I fear is the intelligence and devotion of one hundred million original minds and people trained to a faith in individual initiative. The day that these people, now so materialistic in outward appearance, are stirred spiritually, that day is the day of Germany's doom."

KEEP LOOKING YOUNG

It's Easy—If You Know Dr. Edwards' Olive Tablets

The secret of keeping young is to feel young—to do this you must watch your liver and bowels—there's no need of having a sallow complexion — dark rings under your eyes — pimples — a bilious look in your face — dull eyes with no sparkle. Your doctor will tell you ninety per cent of all sickness comes from inactive bowels and liver.

Dr. Edwards, a well-known physician in Ohio, perfected a vegetable compound mixed with olive oil to act on the liver and bowels, which he gave to his patients for years.

Dr. Edwards' Olive Tablets, the substitute for calomel, are gentle in their action yet always effective. They bring about that exuberance of spirit, that natural buoyancy which should be enjoyed by everyone, by toning up the liver and clearing the system of impurities.

You will know Dr. Edwards' Olive Tablets by their olive color. 10c and 25c per box. All druggists.

"SMALL CAN OF WHALE" MAY BE DAILY ORDER

Vancouver, B. C., Dec. 2—Whale canneng is Canada's most flourishing nifant industry.

A whalery in this province has packed about 30,000 cases of whale meat in neat tin cans for this winter's consumption.

Whales taken near this coast yield from 3 to 12 tons of prime whale meat the whalers say. Boston at present is the best customer for frozen fresh whale.

The Woman's Medical college in Philadelphia, incorporated in 1850, was the first college in the world regularly organized for the education of women for the medical profession.

"This is what I take for a cough or sore throat: Kemp's Balsam. It isn't disagreeable, and you can depend upon it to give quick relief. It's guaranteed. I've used it for years and always keep a bottle on hand." Sold by druggists everywhere.

LEONARDSON'S

Let's Spread the Good News—Things Are Fine

Never mind what the other fellow may think; remember you can't please everybody.

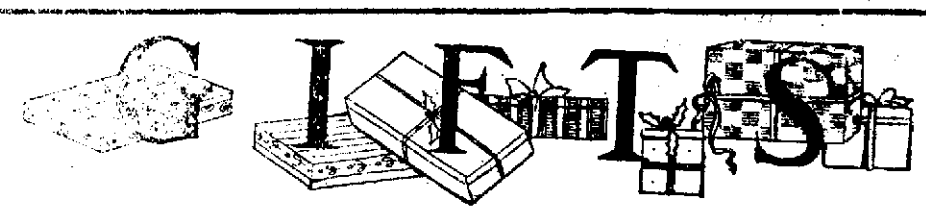

Some people may not like the way the war has ended, some might want this done or that.

Let's have confidence enough in the President to know that he is doing the best thing possible.

And let's rejoice too that peace is here and that the boys will be coming home.

Don't think of what we should have done or could have done; think of what we did do, and be glad enough that you can look into the future with a smile and bright eyes.

There is lots of work ahead for the good, one hundred per cent. American. Get into line.

Gifts

A whole store full of them; for remember that the giving of practical gifts brings into being the newer idea that most every item in the store is suitable for gift-giving. Take ample time in wandering about, jotting down notes of things you see and may want and gradually complete your list.

A Showing of Exquisite Georgette and Crepe-de-Chine Blouses Suitable for Gift-Giving at $5.95

of Georgette Crepe, very daintily and effectively trimmed with filet lace, and certainly there is nothing more effective or more handsome than the combination of filet lace and georgette crepe.

You can hardly imagine the beauty of these waists and their exquisite loveliness until they are tried on and worn with a handsome suit.

The price is extremely moderate, considering the beauty and attractiveness of these blouses.

Umbrellas are Always Recognized as a Sensible, Appropriate Gift

And with the rainy season ahead, who wouldn't appreciate an umbrella for a Christmas gift? Surely, you couldn't possibly give anything more appropriate, anything more sensible or that would be appreciated more.

And please don't think that it is absolutely necessary that your gift of an umbrella need be one that has a gold handle and made of the very finest quality silk for a cover. Quite true, if you can afford to give this kind of an umbrella, so much the better; but on the other hand, thousands of people will appreciate a good, serviceable umbrella—the kind that will stand wear and service.

Here you will find umbrellas at various prices, from $1.25 to $5.75.
